MULTILAYER CERAMIC CHIP CAPACITORS 0805 SERIES

DESCRIPTION

MLCC consists of a conducting material and electrodes. To manufacture a chip-type SMT and achieve miniaturization, high density and high efficiency, ceramic condensers are used. MLCC is made by NPO, X7R, and Y5V dielectric material and which provides medium Voltage product with high electrical precision, stability and reliability.

MAIN FEATURE

- RoHS III Compliant
- Wide Operating Temperature Range -55~+125°C
- High Capacitance and High Voltage In Given Case Size
- A Wide Selection Of Sizes Is Available (0603 to 1812)
- Capacitor With Lead-free Termination (Pure Tin)

APPLICATION

- DC to DC converter
- High voltage coupling/DC blocking
- Back-lighting inverters
- Snubbers in high frequency power converters

HOW TO ORDER

- Please indicate part code OR custom parameters code and send us your RFQ by E-mail

GENERAL ELECTRONICAL CHARACTERISTICS
Table 2

Dielectric	NPO (COG)	X7R	Y5V
Size	0603, 0805, 1206, 1210, 1812		0805, 1206, 1210, 1812
Capacitance range*	0.5pF to 39.0nF	100pF to 1.0μF	10nF to 1.0μF
Capacitance Tolerance	Cap≤5pF: B (±0.1pF), C (±0.25pF) 5pF<Cap<10pF: C (±0.25pF), D (±0.5pF) Cap≥10pF: F (±1%), G (±2%), J (±5%), K (±10%)	J (±5%), K (±10%), M (±20%)	Z (-20/+80%)
Rated Voltage	200V, 250V, 500V, 630V		200V, 250V
Tan δ*	Cap<30pF: Q≥400+20C Cap≥30pF: Q≥1000	≤2.5% (Apply 1.0±0.2Vrms, 1.0KHz±10%)	≤5%
Insulation resistance at Ur**	≥100GΩ or R•C≥1000 whichever is smaller	≥10GΩ or R•C≥100Ω-F whichever is smaller	
Operating Temperature	-55 ~+125°C		-25 ~+85°C
Capacitance Characteristic	±30ppm/°C	±15%	+30/-80%
Termination	Cu (or Ag)/Ni/Sn (lead-free termination)		

Note:

- 1) * Measured at the condition of 30~70% related humidity.
- 2) NPO: Apply 1.0±0.2Vrms, 1.0MHz±10% for Cap≤1000pF and 1.0±0.2Vrms, 1.0kHz±10% for Cap>1000pF, 25°C at ambient temperature.
- 3) X7R: Apply 1.0±0.2Vrms, 1.0kHz±10%, at 25°C ambient temperature.
- 4) Y5V: Apply 1.0±0.2Vrms, 1.0kHz±10%, at 20°C ambient temperature.
- 5) ** Measured at 500VDC for 60 sec, for UR>500VDC

MULTILAYER CERAMIC CHIP CAPACITORS 0805 SERIES

RECOMMENDED PROFILE CONDITIONS

PREHEAT:

In order to minimize the risk of thermal shock during soldering, a carefully controlled preheat is required. The rate of preheat should not exceed 4°C per second and the final preheat temperature should be within 100°C of the soldering temperature for small chips such as 0603, 0805 and 1206, within 50°C of the soldering temperature for bigger chips such as 1210 and 1812 etc.

SOLDERING

1. Use midly activated rosin RA and RMA fluxes do not use activated flux. The amount of solder in each solder joint should be controlled to prevent the damage of chip capacitors caused by the stress between solder, chips, and substrate.
2. Hand soldering with temperature-controlled iron not exceeding 30 watts and diameter of tip less than 1.2mm is recommended, tip of iron should not contact the ceramic body directly, and the temperature of iron should be set to not more than 260°C.
3. For bigger chips such as 1210 and 1812, etc. wave soldering and hand soldering are no recommended.
4. Refer IPC/JEDEC J-STD-020D Method recommended soldering profiles : Reflow not sooner than 15 minutes and not longer than 4 hrs after removal from the temperature/humidity chamber, subject the sample to 3 cycle of the appropriate reflow conditions as defined as blow Table description.
5. Lead-free : Soldering temperature = 235 to 260°C, depending on product.
6. Maximum temperature = Minimum temperature (235°C)+ ΔT + Tolerance for oven process and measurement (5 ~ 7°C)
7. Time at peak temperature = 10sec, Dwell above 217°C = 90sec, Ramping rate = 3°C/sec(heating) and 6 °C/sec (heating).

COOLING

After soldering, cool the chips and the substrate gradually to room temperature. Natural cooling in air is recommended to minimize stress in the solder joint. A cooling rate not exceeding 4°C per second should be used when forced cooling is necessary.

CLEANING

All flux residues must be removed by using suitable electronic-grade vapor-cleaning solvents to eliminate contamination that could cause electrolytic surface corrosion. Good results can be obtained by using ultrasonic cleaning of the solvent. The choice of the proper system is depends upon many factors such as component mix, flux, and solder paste and assembly method. The ability of the cleaning system to remove flux residues and contamination from under the chips is very important.

MULTILAYER CERAMIC CHIP CAPACITORS 0805 SERIES

RECOMMENDED PROFILE CONDITIONS

Chip Size	ΔT
0603, 0805, 1206	100 °C
1210, 1812	50 °C

Soldering	Solder Temp.(Tc)	Soldering Time (tp)
Reflow	235 – 260 °C	< 15 sec.
Wave	230 – 260 °C	< 5 sec.

Profile Feature		Pb-Free Assembly
Preheat /Soak	Temperature Min.(T _{smin})	150°C
	Temperature Max.(T _{smax})	200°C
	Time(t _s) from (T _{smin} ~T _{smax})	60 to 120 seconds
Ramp-up rate(T _L to T _p)		3 °C/second max.
Liquidous temperature(T _L)		217°C
Time(t _L) maintained above T _L		60 to 150 seconds
Peak package body temperature(T _p)		For user T _p must not exceed the Classification temp 260°C For suppliers T _p must equal or exceed the Classification temp 260°C
Time(T _p)* within 5 of the specified °C classification temperature(T _c)		30* second
Ramp-down rate (T _p to T _L)		6 /second max.
Time 25 to peak temperature 260 °C °C		8 minutes max.

Note: For example, T_c is 260°C and time t_p is 15sec. for user: The peak temperature must not exceed 260°C. The time above 255°C must not exceed 15 seconds.

MULTILAYER CERAMIC CHIP CAPACITORS 0805 SERIES

STORAGE AND HANDLING CONDITIONS

- To store products at 5 to 40°C ambient temperature and 20 to 70% related humidity conditions.
- The product is recommended to be used within one year after shipment. Check solder ability in case of shelf life extension is needed.
- Don't open the tape until the parts are to be used, use the chips within 3 months after the tape is opened.
- For product of high dielectric constant (Class2&3, characteristics B/W & Y), the Electro static capacity changes with the passage of time due to the inherent characteristics of ceramic dielectric materials. The changed capacity reverts to nominal at the temperature it reaches during the soldering process.

CAUTIONS

- The corrosive gas reacts on the terminal electrodes of capacitors, and results in the poor solder ability. Do not store the capacitors in the ambience of corrosive gas (e.g., hydrogen sulfide, sulfur dioxide, chlorine, ammonia gas etc.)
- In corrosive atmosphere, solder ability might be degraded, and silver migration might occur to cause low reliability.
- Due to the dewing by rapid humidity change, or the photochemical change of the terminal electrode by direct sun light, the solder ability and electrical performance may deteriorate. Do not store capacitors under direct sunlight or dewing condition. To store products on the shelf and avoid exposure to moisture.

ROHS COMPLIANCE

- The levels of RoHS restricted materials in this product are below the maximum concentration values (also referred to as the threshold limits) permitted for such substances, or are used in an exempted application, in accordance with EU RoHS Directive (EU) 2015/863 EC (RoHS3). RoHS Test Report for this product can be obtained can be obtained at Download Center.

MULTILAYER CERAMIC CHIP CAPACITORS 0805 SERIES

REACH COMPLIANCE

- REACH substances of high concern (SVHCs) information is available for this product. Since the European Chemical Agency (ECHA) has published notice of their intent to frequently revise the SVHC listing for the foreseeable future, REACH Test Report for this product can be obtained at Download Center.

IMPORTANT NOTES AND DISCLAIMER

1. All Product parametric performance is indicated in the Electrical Characteristics for the listed herein test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.
2. NextGen Component, Inc (*NextGen*) reserves the right to make changes to this document and its products and specifications at any time without notice. Customers should obtain and confirm the latest product information and specifications before final design, purchase or use.
3. *NextGen* makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, not does NextGen assume any liability for application assistance or customer product design.
4. *NextGen* does not warrant or accept any liability with products which are purchased or used for any unintended or unauthorized application. No license is granted by implication or otherwise under any intellectual property rights of NextGen.
5. *NextGen* products are not authorized for use as critical components in life support devices or systems without express written approval by *NextGen*.
6. *NextGen* requires that customers first obtain an RMA (Returned Merchandise Authorization) number prior to returning any products. Returns must be made within 30 days of the date of invoice, be in the original packaging, unused and like-new condition. At the time of quoting or purchasing, a product may say that it is Non-Cancelable/ Non-Returnable (NCNR). These products are not returnable and not refundable.
