# **SPECIFICATION SHEET**

KHZ SMD CERAMIC DISCRIMINATOR CASE 6260 DC SERIES

| SPECIFICATION SHEET NO. | R1008- DC450K0000S028  |  |  |
|-------------------------|--|--|--|
| ORIGINAL MFG/PART NO    | TGS Crystals/CDBC 450C28 TLH/CDBC450C28                            |  |  |
| DATE                    | Oct. 08, 2024  |  |  |
| REVISION                | A3 Updated With Most Recent Data                                   |  |  |
| DESCRIPTION AND         | KHz SMD Discriminators 6260 Type L6.2*W6.0*H3.1mm 2 Pads DC Series |  |  |
|                         | 450KHz, Demodulated Bandwidth(3dB): ±4.0KHz Min from 450KHz;       |  |  |
| MAIN PARAMETRICS        | Demodulated Output at 450KHz: 40±20mV                              |  |  |
|                         | Operating Temp. Range -20°C ~+85°C                                 |  |  |
|                         | Reflow Profile Condition 260 °C Max.                               |  |  |
|                         | Package in Tape/Reel, 2000pcs/Reel                                 |  |  |
|                         | REACH/RoHS/RoHS III Compliant, RoHS Annex III lead Exemption       |  |  |
|                         | (exempt per RoHS EU 2015/863)                                      |  |  |

# VENDOR APPROVE Issued/Checked/Approved Date: Oct. 08, 2024

Date:

10/8/2024

**CUSTOMER APPROVE** 

KHZ SMD CERAMIC DISCRIMINATOR CASE 6260 DC SERIES

### MAIN FEATURE

- KHz SMD Ceramic Discriminator 6260 Type 2 pads
- White case, L6.2\*W6.0\*H3.1mm
- Low Cost And Short Shipment
- Reflow Profile Condition 260 °C Max.
- Cross Main Competitors Parts CDBC and JTC series
- For Quadrature Detection With IC: TOSHIBA/TA31142F
- REACH/RoHS/RoHS III compliant, RoHS Annex III lead Exemption

(Exempt per RoHS EU 2015/863)

### APPLICATION

Communication Electronics

### HOW TO ORDER

• Please follow up part code guide and indicate part code when you order or RFQ.

### PART CODE GUIDE

| CODE | NAME               | KEY SPECIFICATION OPTION  |
|------|--------------------|---|
| DC   | Product Series     | KHz SMD Ceramic Discriminator Case 6260, 2 Pads, Dimension<br>L6.2*W6.0*H3.1mm                            |
| 450K | Frequency Range    | 450: 450KHz; 455K: 455KHz   |
| 0000 | Internal Control   | Letter or Digits (A~Z, a~z or 1~9)  |
| S    | SMD Type Package   | Tape/Reel   |
| 028  | Special Parametric | Letter or Digits (A~Z, a~z or 1~9)  |
| - XX | Suffix             | Blank: N/A<br>XX: Internal Control Code, Letter A~Z, a~z or digits (0~9) for<br>Special/Custom Parameters |

specifications should be obtained from the

product dimension.

### MATERIAL LIST

| NO. | ITEM      | MATERIAL  |
|-----|-----------|---|
| 1   | Case      | Polybutene Terephthalate (Mixture Of Glass Fiber) |
| 2   | Terminal  | Phosphor Bronze Ag Clad                           |
| 3   | Base Seal | Epoxy Resin                                       |

### MEASUREMENT

- Measurement shall be carried out at the standard temperature of 25±2°C. If no specific requirements, Test can be carried out under 5-35°C.
- Measuring Circuit: For Quadrature Detection With IC: TOSHIBA/TA31142F

### **GENERAL ELECTRICAL CHARACTERISTICS** - FOR DIFFERENT PART CODE- Ta = 25°C

| PARAMETER             | UNITS | VALUE               |         |      | CONDITION      |
|-----------------------|-------|---------------------|---------|------|----------------|
|                       |       | MIN.                | TYPICAL | MAX. |                |
| Operation Temperance  | °C    | -20                 |         | +85  |                |
| Storage Temperance    | °C    | -40                 |         | +85  |                |
| Temperature Stability | %     |                     |         | ±0.5 | @ -20°C ~+85°C |
| Withstand Voltage     | V     | DC 50V For 1 minute |         |      |                |

### **TEST METHOD AND CONDITIONS**

Measurement Condition: Unless otherwise noted, the standard range of atmospheric conditions for measurements and tests are as follows:

Ambient temperature:5°C to 35 °C Relative humidity :45% to 85%; Air pressure :86Kpa to 106 Kpa If there is doubt about the results, measurement shall be made within the following limits: Ambient temperature: 18°C to 22 °C; Relative humidity :60% to 70%; Air pressure: 86Kpa to 106 Kpa

| TEST ITEMS                       | TEST METHOD AND CONDITIONS  | REQUIREMENT  |
|----------------------------------|---|--|
| Demodulated 3dB<br>Bandwidth     | Input the above signal and sweep the carrier around<br>450kHz, and find Out the maximum audio output<br>frequency. Then sweep the carrier frequency again and<br>find two frequencies, which are observed –3dB<br>attenuation points from the maximum point. Higher | No visible damage and it<br>meet Table at Page 5/6 |
|                                  | frequency point is called (f1) and lower called (f2).<br>(F1-450KHz) is defined as upper 3dB bandwidth and<br>(450KHz -f2) defined as lower 3dB bandwidth.  |  |
| Demodulate<br>Output             | Demodulated output shall be measured when carrier frequency is adjusted to 450KHz.  | No damage and it meet<br>Table at Page 5/6         |
| Demodulated<br>Distortion Factor | Carrier frequency is adjusted to 450KHz And distortion shall be measured with 1 kHz modulation frequency.   | No damage and it meet<br>Table at Page 5/6.        |
| Input Signal<br>Condition        | Input signal condition, Input level 80dBμ<br>Frequency Deviation ±4.0KHz<br>Modulation Frequency: 1.0KHz  |  |

### **ENVIRONMENTAL CHARACTERISTICS**

| TEST ITEMS    | MEASUREMENT CONDITION   | REQUIREMENT                 |
|---------------|---|-----------------------------|
| Humidity      | After being placed in a chamber with 90-95% R.H. at                         | It shall meet Table at Page |
|               | $40\pm 2^{\circ}C$ for 100 hours and then being placed in room              | 5/6                         |
|               | temperature for 1 hour, filter shall be measured.                           |                             |
| High          | After being placed in a chamber with 80±2°C,for 100 hours                   | It shall meet Table at Page |
| Temperature   | and then being placed in room temperature for 1 hour ,                      | 5/6                         |
|               | filter shall be measured.   |                             |
| Low           | After being placed in a chamber with -20±2°C,for 100                        | It shall meet Table at Page |
| Temperature   | hours and then being placed in room temperature for 1                       | 5/6                         |
|               | hour, filter shall be measured.   |                             |
| Heat Shock    | After being kept at room temperature, filter shall be                       | It shall meet Table at Page |
|               | placed at temperature of –55 $^\circ\!\mathrm{C}$ , for 30 minutes, then be | 5/6                         |
|               | placed at temperature. 85°C, for 30 minutes. After that                     |                             |
|               | returned to –55°C again. Repeated above cycle for 5                         |                             |
|               | times. After being kept in room temp. for 1 hour, filter                    |                             |
|               | shall be measured   |                             |
| Resistance to | Lead terminals are immersed up to 1.5mm from filter's                       | It shall meet Table at Page |
| Solder Heat   | body in soldering bath of 350± 10℃, for 3±0.5 sec. And                      | 5/6                         |
|               | then filter shall be measured after being placed in room                    |                             |
|               | temperature for 1 hour.   |                             |
|               |   |                             |
| L             |   |                             |

KHZ SMD CERAMIC DISCRIMINATOR CASE 6260 DC SERIES

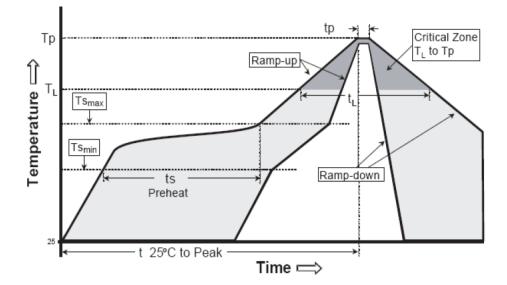

### **PHYSICAL CHARACTERISTICS**

| TEST ITEMS                   | TEST METHOD AND CONDITIONS  | REQUIREMENT                                |
|------------------------------|---|--|
| Random Drop/<br>Drop Test    | Filter shall be measured after 3 times random drops from the height of 30cm on concrete floor   | No damage and it meet<br>Table at Page 5/6 |
| Vibration                    | Filter shall be measured after being applied vibration of<br>amplitude of 1.5mm with 10-55Hz band of vibration<br>frequency to each of 3 perpendicular directions for 2 hours   | No damage and it meet<br>Table at Page 5/6 |
| Solderability                | Lead terminals are immersed in aide solder for 5 sec and<br>then immersed in soldering bath of 230±5°C, for 3±0.5 sec.<br>At least 95% lead terminals shall be covered with solder  | No damage and it meet<br>Table at Page 5/6 |
| Substrate Bending<br>Test    | After lead terminals shall be fixed at 2mm from filter's<br>body, they shall be folded up to 90°from their axial<br>directions and folded back to –90°.Then folded back to<br>their axial direction, the speed of folding be each 3<br>seconds. | No damage and it meet<br>Table at Page 5/6 |
| Terminal Strength<br>Pulling | After force of 1kg for 10 seconds is applied to each terminal in axial direction, Filter shall be measured.   | No damage and it meet<br>Table at Page 5/6 |

### IMPORTANT NOTES AND DISCLAIMER

- ROHS COMPLIANCE: The levels of RoHS restricted materials in this product are below the maximum concentration values (also referred to as the threshold limits) permitted for such substances, or are used in an exempted application, in accordance with EU RoHS Directive (EU) 2015/863 EC (RoHS3). RoHS Test Report for this product can be obtained at Download Center.
- REACH COMPLIANCE: REACH substances of high concern (SVHCs) information is available for this product.
   Since the European Chemical Agency (ECHA) has published notice of their intent to frequently revise the SVHC listing for the foreseeable future, REACH Test Report for this product can be obtained at Download Center.
- 3. All Product parametric performance is indicated in the Electrical Characteristics for the listed herein test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.
- 4. NextGen Component, Inc (*NextGen*) reserves the right to make changes to this document and its products and specifications at any time without notice. Customers should obtain and confirm the latest product information and specifications before final design, purchase or use.
- 5. NextGen makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, not does NextGen assume any liability for application assistance or customer product design.
- 6. NextGen does not warrant or accept any liability with products which are purchased or used for any unintended or unauthorized application. No license is granted by implication or otherwise under any intellectual property rights of NextGen.
- 7. NextGen products are not authorized for use as critical components in life support devices or systems without express written approval by NextGen.
- 8. NextGen requires that customers first obtain an RMA (Returned Merchandise Authorization) number prior to returning any products. Returns must be made within 30 days of the date of invoice, be in the original packaging, unused and like-new condition. At the time of quoting or purchasing, a product may say that it is Non-Cancelable/ Non-Returnable (NCNR). These products are not returnable and not refundable.
